

# Raspberry Pi

You can plug headphones in here to listen to your pi

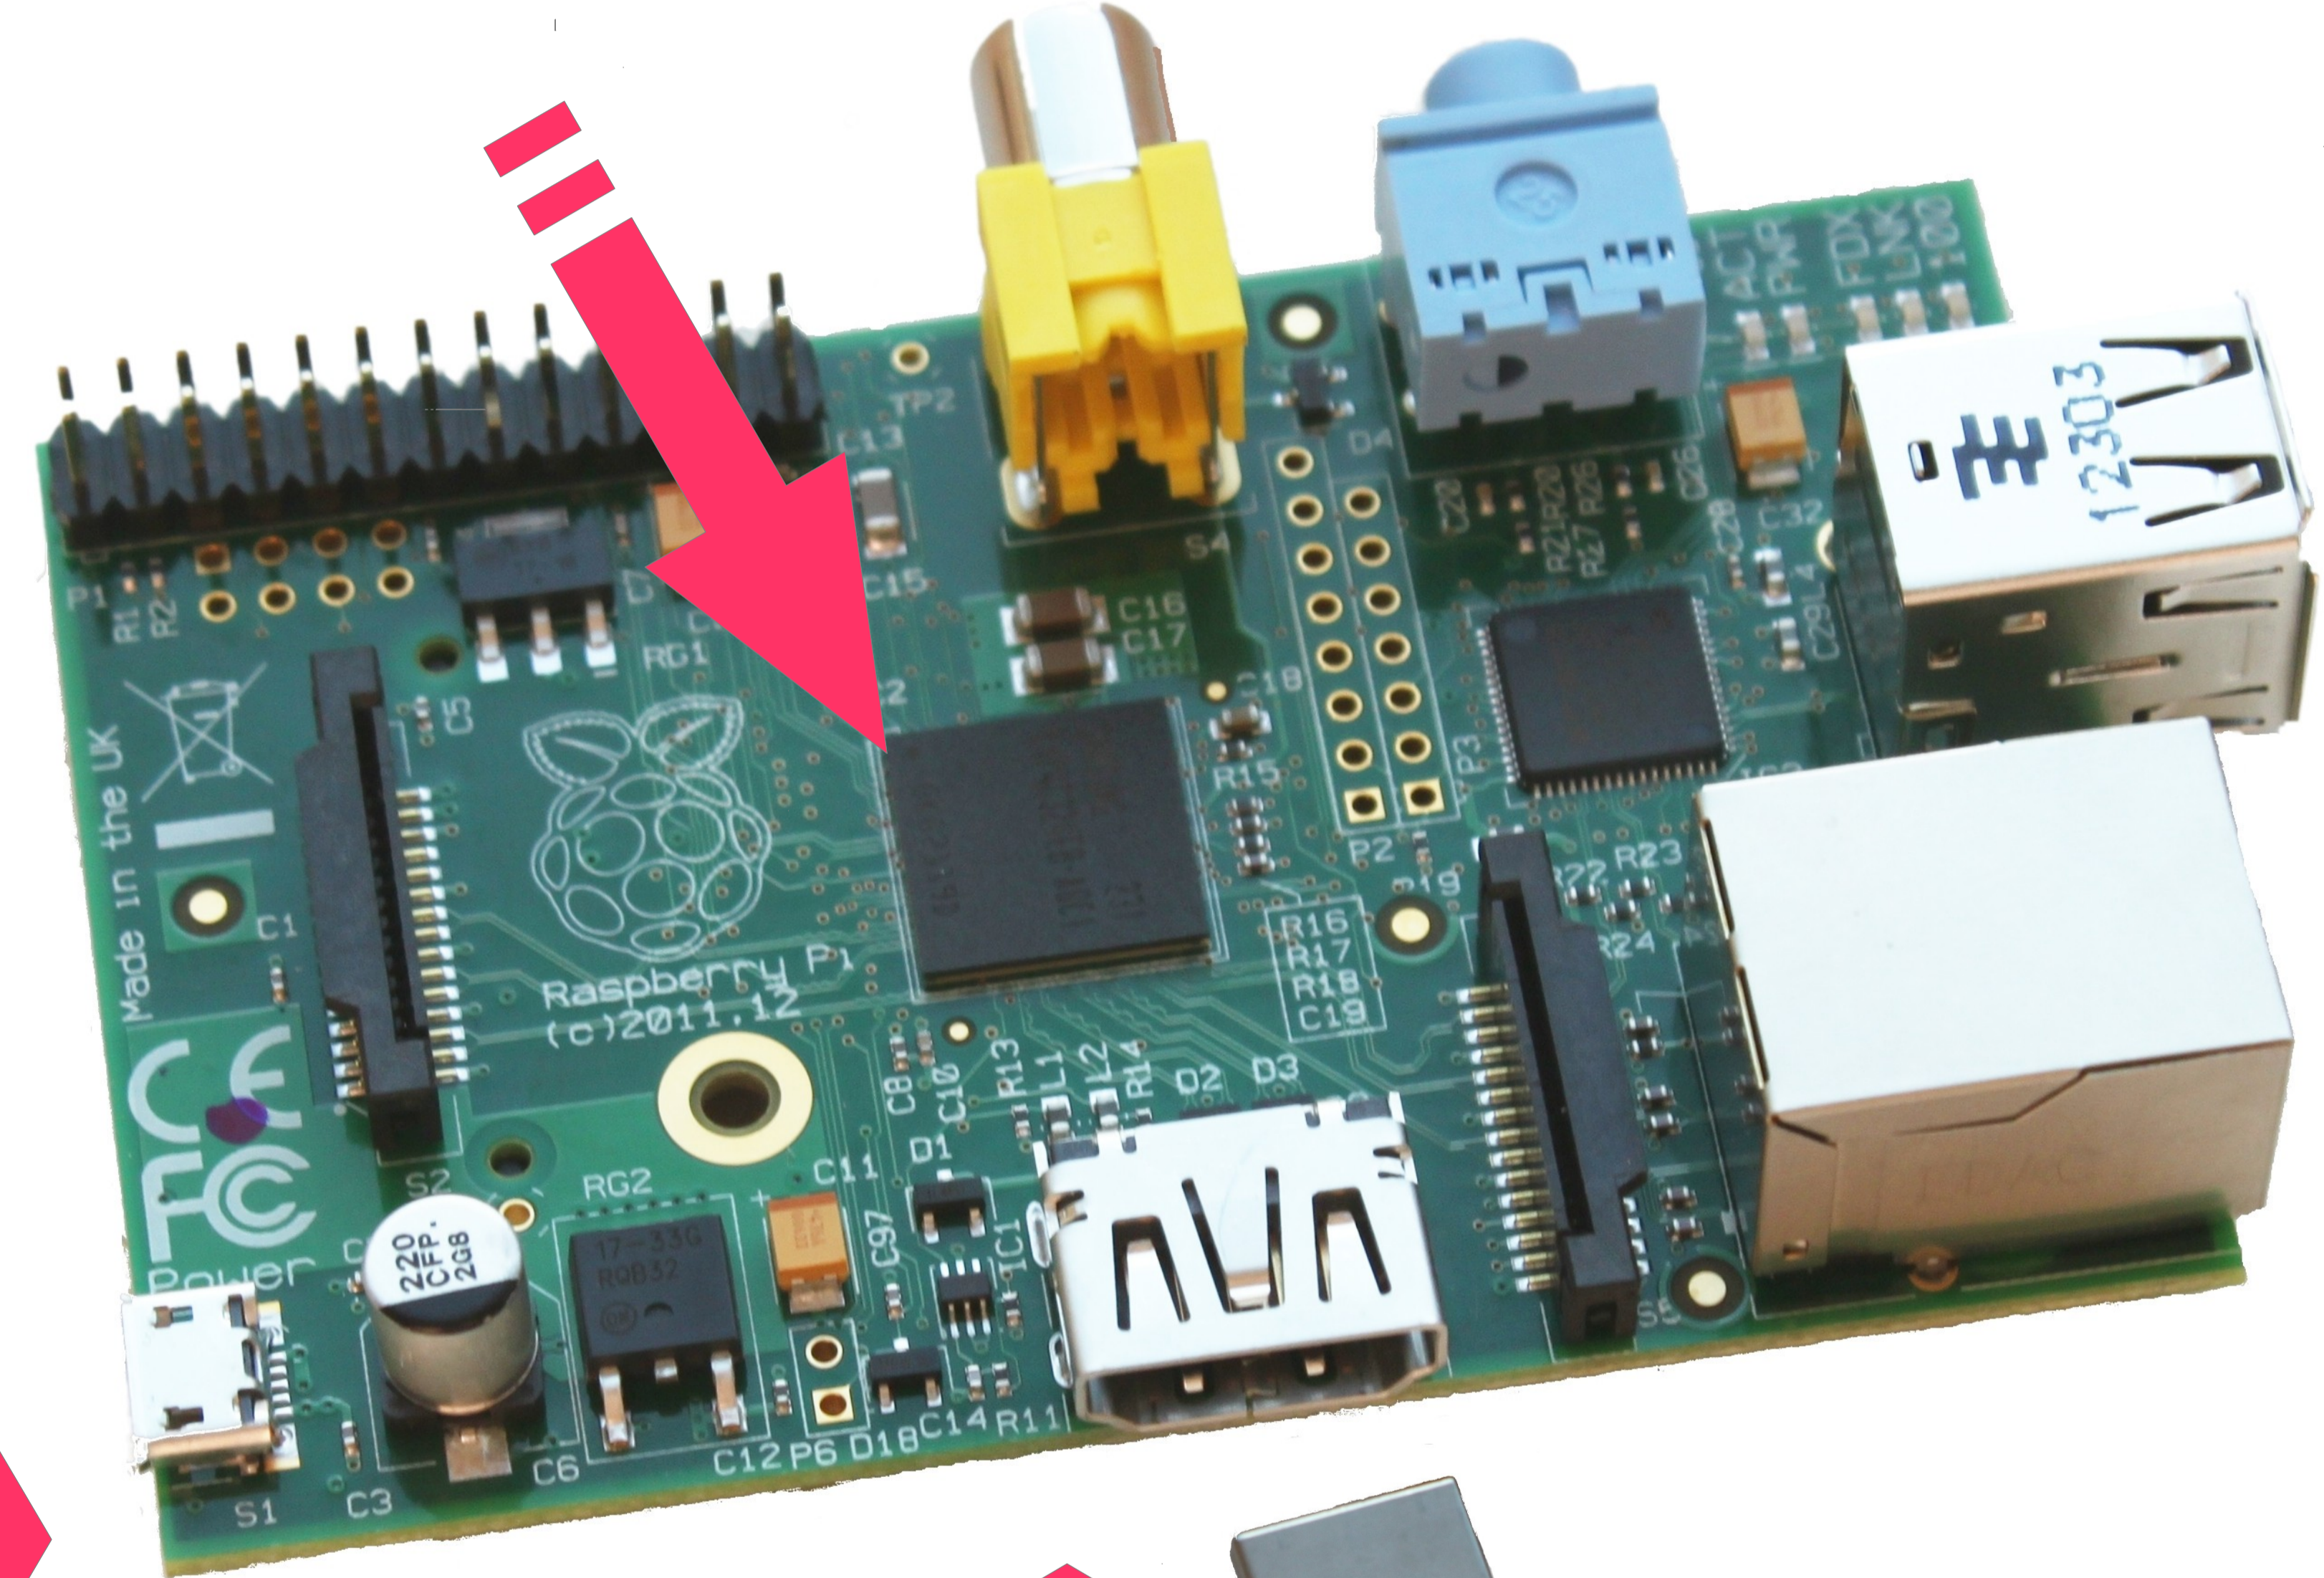

Processor and memory on one chip

SD card (like in a camera) acts as a hard disk

Micro USB (like you use to charge a phone) gives power

A USB keyboard & mouse, or a USB hub if you need to plug in more stuff

If you have a wired network you can use ethernet

HDMI can plug into a TV or a computer screen

Poster created as part of the GOWS Get On With Science Project, by Hannah Dee of Aberystwyth University and Tomi Rowlands of Ysgol Bro Ddyfi. For more information see [http://bit.ly/gows\\_dyfi](http://bit.ly/gows_dyfi)
