

**Results - assessment totals**  
 Assignment results (from **?\_Marks**)  
 Raw mark (calculated)

**Summary sheet**  
 Assignment results (from **?\_Marks**)  
 Raw mark (from **Results**)  
 Returned mark (calculated)  
 Fail code (calculated)

**Marks Input Sheet**  
 Student ID from **STR00009**  
 All remaining columns from Results  
 Flags from **STR00009**

Overriding the task or question marks on the **Results** sheet **will not** be propagated to the **Summary** sheet

Overriding the Raw mark on the **Results** sheet will result in the value being propagated to the **Summary** sheet. This will clearly also override any task marks.

Changing marks on the assessments **?\_Marks** sheet will propagate to the Results and summary sheet.

Overriding any entry on the Summary sheet will propagate to the results sheet, however the totals will not be calculated from the task entries on this sheet

Overriding any entry on the MarksInput sheet will not cause the totals to be updated. The Raw mark formula could be changed to do this if necessary.
