

# The HiMet project

This was a [BBSRC](#) project under the [Exploiting Genomics](#) initiative. See the [OASIS](#) database entry.

The project ran from early 2003 until mid 2006 and a number of centres and groups were involved:

- [The University of Wales, Aberystwyth](#)
  - The [Computational Biology Group](#) in the [The Department of Computer Science](#)
  - The [Institute of Biological Sciences](#)
- [The John Innes Centre \(JIC\)](#)
  - The [Department of Metabolic Biology](#)
- [The University of Manchester](#)
  - The [School of Chemistry](#)
- [Rothamsted Research](#)
  - The [Phytochemistry Group](#)
- [The University of York](#)
  - The [Centre for Novel Agricultural Products](#) in the [Department of Biology](#)
